2, has many features. The two of them cannot be compared. 1. They are also best in the number of sketches and shapes. However, the framework of MagicDraw is so simple. It is hard to learn. The software has eight main functions: the first is a function. Description: This book deals with a proven method for the structural analysis of communication networks. The main contributions and techniques presented in this book are based on the results of several empirical studies on the structural analysis of communication networks. The main goal of the book is to present a simple and efficient method for the structural analysis of social networks. The method presented is based on a structural model of social relationships. The structure of this model is an undirected network having a structure of groups. The structural analysis is based on the relational data (knowledge) and quantitative data (quantitative data analysis and visualisation). The results of the structural analysis are the measures of network structure. The essential knowledge of the topics covered in the book is provided by the list of tables and a list of figures. The English edition was published in 2016 by. The book is suitable for graduate students and post-doctoral researchers in social science research. The book also covers the issues of application for implementation in the network analysis. The book uses a language which is well accepted by readers from different countries (English). The presentation style is aimed at social sciences, social and cultural studies. The tool can be used not only as a technical documentation but also as a quick information source for decision-makers and researchers. The book includes information about all the latest developments. The book includes a wide list of tables, figures, and tables and figures. The list is only the basic information. Other information is given with figures and tables. The book is suitable for graduate students and post-doctoral researchers in social science research. The book also covers the issues of application for implementation in the network analysis. The presentation style is aimed at social sciences, social and cultural studies.
